## **REQUIREMENTS FOR REGISTRATION IN BOTSWANA**

To register as a pharmacist in Botswana you must apply for permission to establish a private practice or to seek employment within the public or private sector. Once such employment or permission, as the case may be, is granted registration normally follows, provided the applicant has proof of qualification, proof of registration in Great Britain and evidence of good standing with the RPSGB.

The applicant must indicate the area/town in which they wish to establish a private practice. It is doubtful that any application will be successful as the major towns are currently over subscribed with private practices.

For further information concerning this process please contact:
